

Statement of Purpose

I have made a decision to pursue a Master's program in Educational Psychology. I am going to concentrate mostly on the incentives that stimulate me to pursue further studying, and reflect the motives for my choice of XXX University as well as state my future career objectives. I believe that my educational background matches what you need in this field of study. Being a psychologist with considerable experience in mind and therapy, I find the field of psychology quite fascinating for it effectively with the human mind. With this program, I aim to learn the best lesson of psychology and gain necessary skills that are required for effective utilization of education. My objective is to have a bigger career path in my country as an Educational Psychology or Clinical Psychology with excellent education. I want to create a new standard and develop their own hometown education system from learning on a larger scale.

The reason why I chose Science Psychology for my Bachelor's was because when I was in high school, social science related subjects passionate me. Thus, I found myself wondering and would like to learn more about a variety of psychology and how they well-organized the people's mind to go in the right direction. With this impression and wonder by their success in the psychology business. I always wanted to learn about how they can achieve their goal. As I kept curious about this I purposely to Bachelor's Degree in Science Psychology.

During the years being collegian, I found myself having more interest in education. I love studying how they bring psychology to study and make learners more efficient in their studies. Thus after I graduate with my Bachelor's Degree, I am ready to grow into a position where my efficiency can be a difference in a Thai education. At the same time I also enjoy learning about how to guide people in the right direction or the direction that they want to go. Moreover I develop my education skills at an early age by being a School Therapist in Y School. Alternatively I joined a corporate company in the role of University Consultants Executive. After getting trained in the Student Care Program, I started working with the Chief Psychologist in the Education Area. My role was caring and helping students with risky behaviors or students in need by speaking, mentoring individual students, assessment groups screening and treatment initially. This project not only gave me a better understanding of business and processes but also helped me in improving psychological skills.

For my future career path, with my 4 years of experience in psychology, I found that Australia is the best place to study. Australia's education system is recognized worldwide and maintains high standards. Learning in such a place will boost my career perspective. I have the expectation that I would like to work in the Ministry of Foreign Affairs of Thailand. So I would like to have the opportunity to understand the education system and study the life of foreign people, how they live, think and live together because Australia has so many people that have different nationalities. Having real experience overseas will be able to allow me to be selected for working in the Ministry of Foreign Affairs of Thailand. I believe this course will equip me with the

latest trends and upcoming processes. In addition to the safety of the university, peace, facilities and educational equipment make your university most suitable for international students like me. I am enthusiastic to experience the variety in Australia by networking with multiculturalism peer groups. And I also have the opportunity to exchange ideas with friends from other countries. I am sure the opportunity that I will get this time. I will adapt it to my country to the best value. And I will bring Australian culture to the people of my country.

Australia offers a wide range of jobs and offers students the opportunity to work for an educational experience outside of the classroom. Australia is also one of the largest destinations for international students, providing high quality study for the value of money. The duration of study in most of Australia takes about 1 year, which is a good time. There is not a long gap-time for me to come back and apply for a job that I have been expecting. As well as the environment in the school that allows me to learn both inside and outside of the classroom. What made me choose your university was because your university is highly ranked in Australia. It is ranked third and has a lot of international students who are interested and come to study. Being a university with many educational facilities such as swimming pools, libraries, convenience stores, bus stops, parking lots and banks. There are various sporting and recreation facilities such as indoor stadiums, swimming pools, playing fields, gym and training facilities for football. Apart from all these facilities, what actually got my attention towards the university is its beautiful building and the traditional building which will help me gain insight about the latest trends and technologies. I will be the one who gets to know more in-depth information. Methods of planning, data management, business strategies, problem management, decision making, communication, liaison with others and group working. Learning these things will make me a more effective person in this field and can contribute to the development of people, systems in my country.

Studying at your university would surely help me refresh all my psychological skills gained through my experience so far and try to work out more practical knowledge gained at the University. Having the opportunity to study at your university will make me a better person. Be a more reliable person. Be another person who can develop the country in a better way. I am sure that your university will be able to provide the knowledge that is lacking. and opened up a whole new world of experiences for me that laid the path to a great career ahead.

Your Sincerely,
Student Signature
